

Hello, this is CodeGoat's Dev team! We put together this user guide to help you get started on our platform.

## Step 1: Make an Account

When you first open our website, you will see a landing page similar to the one below.

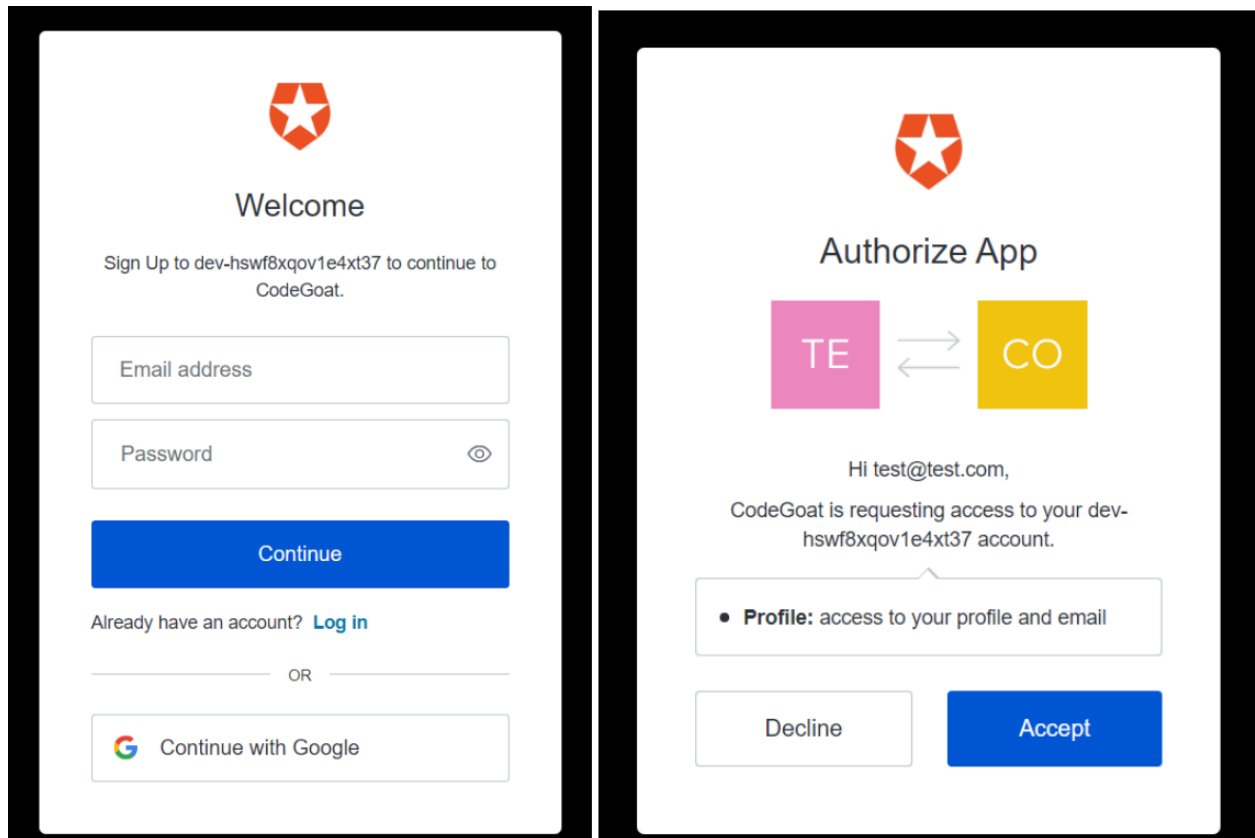

Before you can start with our services, you will need to create an account. You can do so by clicking on the buttons at the top right of the navigation bar at the top. Also, we here at CodeGoat prefer the dark theme. But if you are a fan of light mode, click the crescent icon!

Sign up if you do not already have an account, and if you are a returning user, log in.

You will then be redirected to sign up for an account. Enter your email address and create a password according to Auth0's password requirements. (These will be listed as you are creating your password.) Then, authorize the app to allow access to your profile.

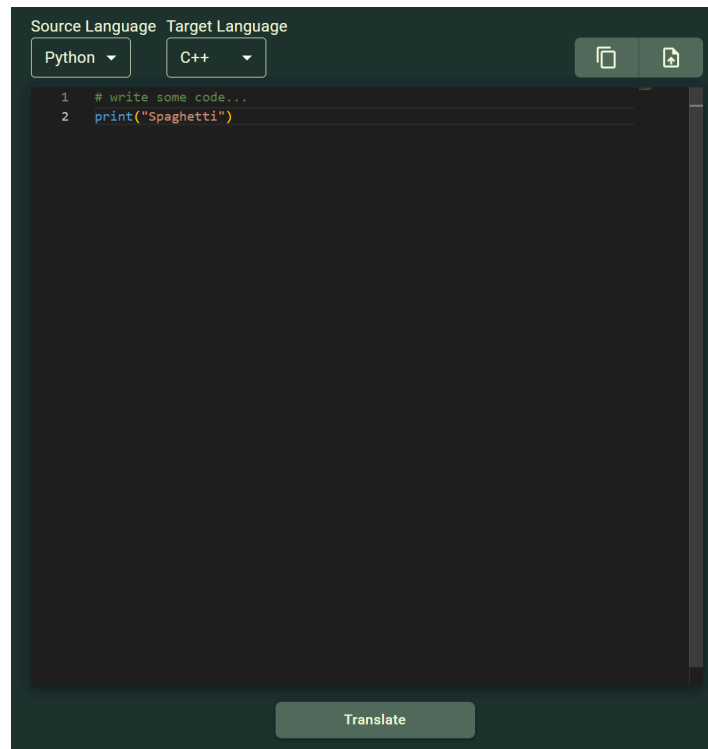

Follow the instructions. Once finished, you will be redirected to the home page again, where you will now have access to the translation and feedback pages.

## Step 2: Translation

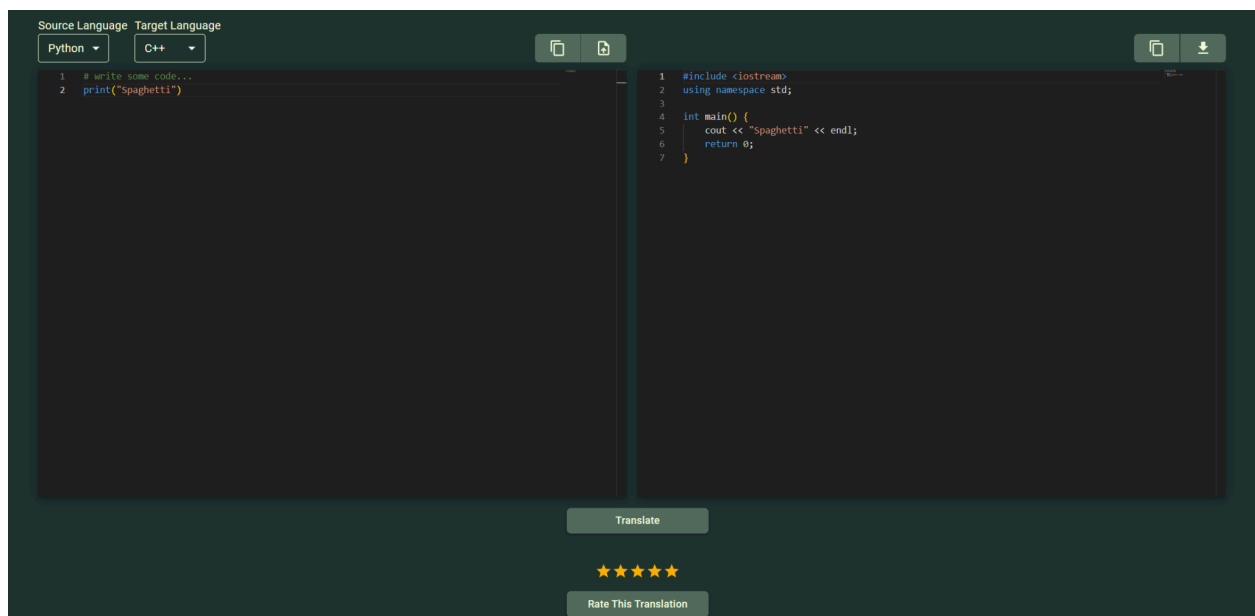

At the top of the page on the navigation bar, there is a button that will redirect you to the translation page. Click on Translate.

You will see the textbox after navigating to the new page. Be sure to choose the source language to match the code you want to translate. Then, at the bottom of the screen, press Translate and watch your code be translated before your eyes!

The output codebox will appear with your translation! You can either copy it to clipboard or download the output as you please.

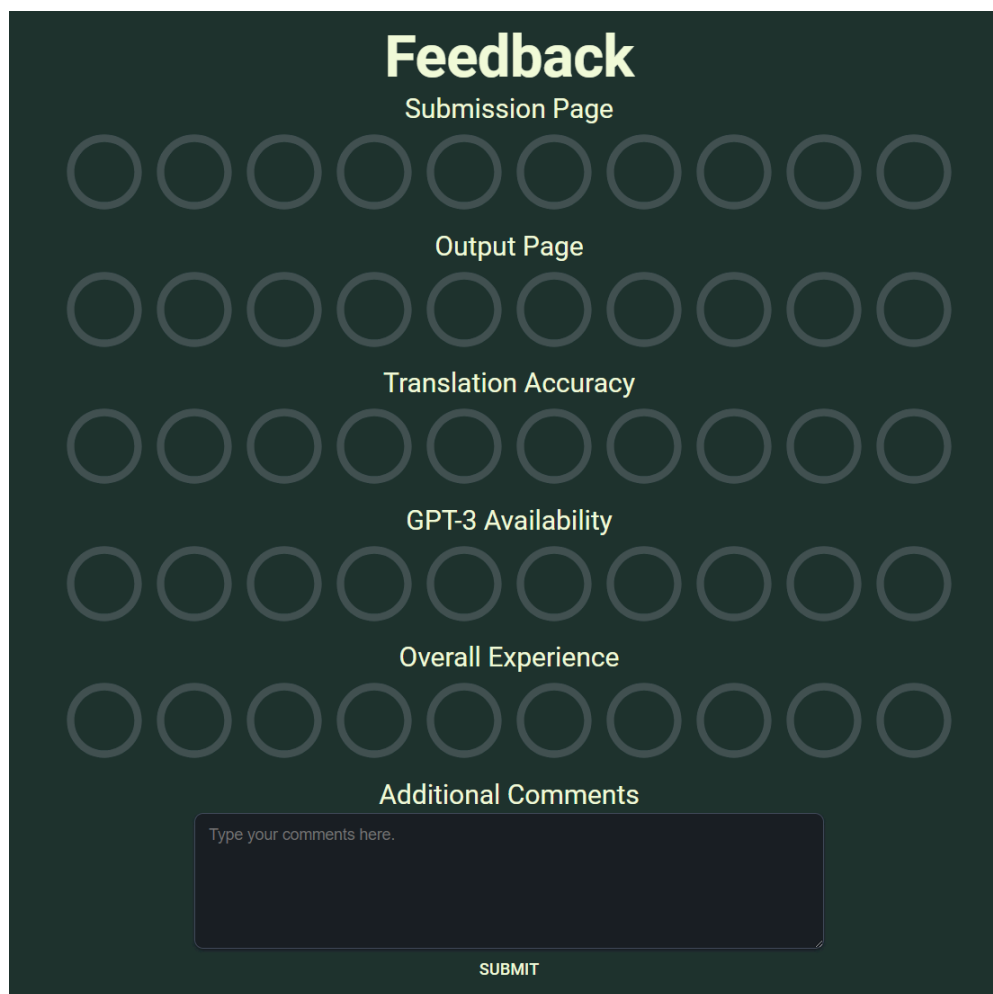

Let us know how we did with your translation by selecting 1 to 5 stars below the Translate button, and hitting “Rate This Translation.”

### Step 3: Feedback

At CodeGoat, we are always looking to improve. Let us know your thoughts on our various pages by clicking the Feedback button in the middle of the navigation bar.

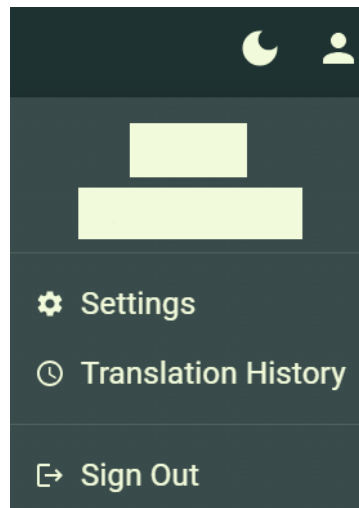

This page allows you to rate each of our pages on a scale from 1-10 by selecting the bubbles. You can also be more specific about your feedback using the text box at the bottom. Don't forget to click Submit when you are done.

A feedback form on a dark green background. At the top is the title "Feedback" in large white text, followed by the subtitle "Submission Page" in smaller white text. Below this are five rows of ten light green circular rating bubbles each. The rows are labeled: "Output Page", "Translation Accuracy", "GPT-3 Availability", "Overall Experience", and "Additional Comments". The "Additional Comments" label is positioned above a dark grey text input box with the placeholder text "Type your comments here.". At the bottom center is a white "SUBMIT" button.

## More Features

We implemented a translation history feature so you can access your previous code translations within just a few seconds. No need to go digging for your code to translate it again!

Click on Translation History, which can be found in your profile dropdown, as shown above. You will be brought to something like the page below.

The screenshot shows the 'CodeGoat' website's 'Translation History' page. The header includes the CodeGoat logo, navigation links for 'TRANSLATE', 'FEEDBACK', and 'DOCUMENTATION', and a dark mode toggle with a user icon. The main heading is 'Translation History'. Below it is a 'Filter' section with dropdowns for 'Input Language' and 'Output Language', and date pickers for 'mm/dd/yy' with a 'to' separator. A 'Sort' section follows, with columns for 'INPUT LANGUAGE', 'OUTPUT LANGUAGE', and 'TRANSLATION DATE' (with an upward arrow icon). There are also links for 'RESET ALL FILTERS/SORTS' and a red 'DELETE ALL HISTORY' button. The table lists three translations: 'C++ -&gt; Python' (April 7, 2024, 11:03 PM), 'C++ -&gt; Python' (April 7, 2024, 11:01 PM), and 'Python -&gt; C++' (April 7, 2024, 11:01 PM). A pagination bar at the bottom shows '1'.

From here, you can filter your previous translations by input language, output language, or a range of dates in which the translation was submitted. Additionally, you can sort the results by these fields. Note that clicking the sort buttons will toggle them between increasing, decreasing, and none. For convenience, there is a button to reset all of your filter and sorting criteria.

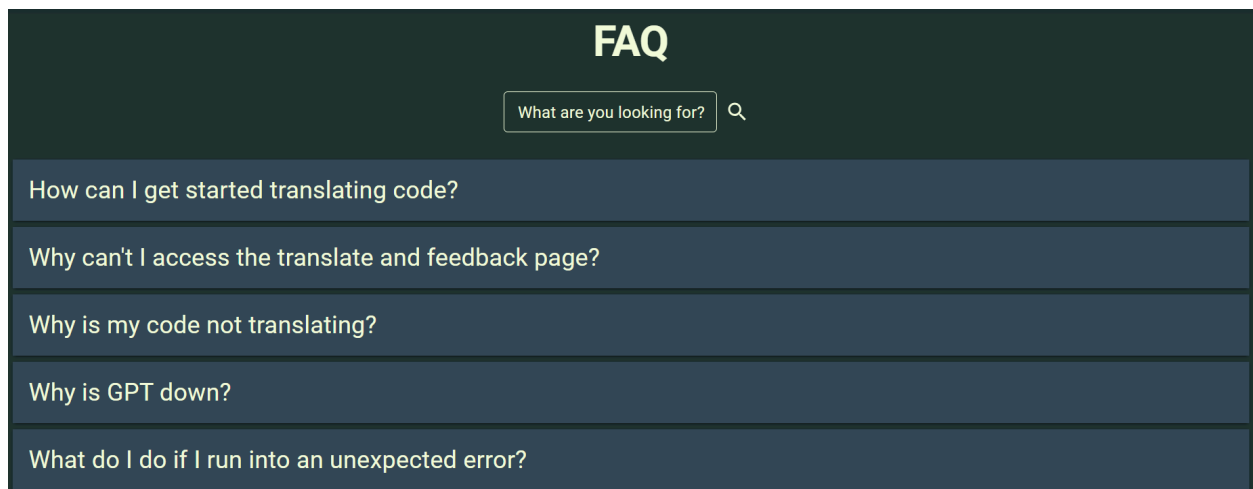

Be careful clicking the big red button! This will wipe your translation history if this is something you are interested in doing.

## More Help

If you found this user guide, then you must have already found this Documentation page in the navigation bar.

As you probably guessed, you can find more information about specific features of our website here in our FAQ section. Click on one of the questions to see its answer.

We also have some pdfs with more information about our application, including this user guide. If you want to learn more about ChatGPT, or about CodeGoat's dev team and the project, we have documents for that as well!
